## TUTORIAL DE INSTALAÇÃO DO ABAQUS VERSÃO 6.14

Acesse a pasta onde estão os arquivos de instalação e execute o arquivo "setup.exe". Em seguida abrirá a tela para a instalação do software.

Abrirá uma tela com algumas etapas que deverão ser cumpridas até o final da instalação. Siga os passos descritos nas imagens.

Após iniciar o procedimento de instalação do SIMULIA FLEXnet License Server (Figura 3), verifique o nome do computador e copie exatamente como está configurado (Figura 4).

Após a realização dos passos anteriores, a instalação do SIMULIA FLEXnet deve ser finalizado sem problemas.

Ignore a mensagem de erro e continue a instalação.

esktop\Abaqus\\_SolidSQUAD\_\Windows\SIMULIA\License

Execute o servidor de licença Imtools.exe. Siga os seguintes passos:

- 1) Na aba Config Services, clique em Remove Services;
- 2) Clique em Browse e localize os arquivos conforme imagem 11;
- 3) Após localizar os arquivos, clique em Save Service.
- 4) Na aba Start/Stop/Reread, clique em Start Server. Deverá Aparecer a mensagem "Server Start Successful".
- 5) Após a realização dos seguintes passos, o LMTOOLS pode ser fechado.
